PROFILE

- A 13-year-experienced QA Engineer with a robust background in both manual and automated testing for web and mobile platforms.
- Capable of building automation frameworks, seamlessly integrated with CI/CD tools to improve test coverage and enhance stability
- Seasoned Linux user adept in scripting and debugging
- Thrives in Agile environments with a commitment to integrating quality from the start of the development lifecycle.

SKILLS

- Appium, Playwright, Browserstack, Qmetry, Git, Github, Jenkins
- Python, JavaScript, TypeScript, Java, Bash
- Test plan development
- Automation test development
- Jira, Confluence
- Teamwork and positive attitude

EDUCATION

VNUHCM - University of Science
2007 – 2012 | HCMC, Vietnam

PROFESSIONAL EXPERIENCE

Senior Quality Control Engineer

Humanforce

04/2023 – 06/2025

- Created a comprehensive regression test plan for the established application
- Solely responsible for designing, building, and maintaining a mobile automation using Appium and Pytest, enabling scalable, cross-platform (iOS and Android) testing.
- Adopted shift-left testing practices.
- Got recognized by the QA manager for my effort in building a robust automation framework
- Organized workshops for devs to bring them up to speed on test automation.

Senior Quality Control Engineer

11/2019 – 12/2022

- Played a key role in building an automation framework to validate both security and business logic for a privacy-focused blockchain platform.
- Actively engaged with the community by providing support, answering questions, and contributing to user adoption and technical discussions.

Senior Quality Control Engineer

Premielink

10/2018 – 11/2019

- Maintained overall quality for a mobile app of a surveillance system.
- Designed and executed manual as well as automation tests to ensure reliability and performance across releases.

Quality Control Engineer

Terralogic Inc.

05/2012 – 03/2018

- Worked across multiple projects involving desktop application testing and network testing, utilizing both manual and automation approaches.
- Got promoted to Team Leader for outstanding performance on multiple testing projects.
- Utilized automation testing and CI/CD tools to not only enhance testing efficiency but also improve the daily working process.
- Managed project documentation and workflows through Jira and Confluence.
- Employed Spirent and IXIA tools for comprehensive network testing solutions.
